BIOENGINEERING INNOVATION & ENTREPRENEURSHIP

DO YOU HAVE AN IDEA OR PROJECT THAT YOU WOULD LIKE TO PURSUE?

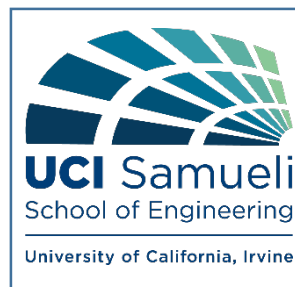

Seeking physicians, scientists, clinicians, and industry representatives to mentor UC Irvine biomedical engineering students to develop innovative healthcare solutions.

3 quarter (**9 months**) Capstone Design Sequence where teams of 4-6 students in the Professional Master of Engineering Program and Undergraduate Senior Design Course will:

- Survey unmet needs
- Define FDA design control requirements and product specifications
- Explore market entry strategies and commercialization
- Determine optimal technical solution, fabricate and test a prototype
- Document and present project development results
